

S5 Drop Down Panel

Written by Administrator

Thursday, 14 July 2011 03:27 - Last Updated Thursday, 14 July 2011 03:36

This month another new addition to the Vertex Framework is the S5 Drop Down Panel. This is a feature that was seen in several Shape 5 templates and labeled as "S5 Ultimate Drop Down". Many have asked how to add to other templates so we decided to build this into the framework so every design here on out will have this functionality. We've also added quite a bit of flexibility for configuration in the back-end. Be sure to read more about these new features below:

- Customize almost everything! Shadows, borders, gradient, opacity
- Contains 6 module positions drop_down_1, drop_down_2, drop_down_3, drop_down_4, drop_down_5 and drop_down_6
- Auto adjust to the height of your content
- Set your own open and close text
- Auto collapse if not modules published to it
- And many more features!

Screenshot of Drop Down admin in template parameters area:

The screenshot shows a configuration interface for the S5 Drop Down Panel. It features a tabbed menu at the top with 'Template Specific', 'Layout', 'Menu', 'Row Sizes', 'Mobile', and 'General'. The 'Template Specific' tab is active, and within it, the 'Buttons and Toolbars' sub-tab is selected. The 'Drop Down' section is highlighted. The interface contains a list of configuration options for the button and the drop-down panel, each with a corresponding input field or dropdown menu.

Parameter	Value
BUTTON OPEN TEXT	Open Panel
